

Digital Transformation Legally Reliable Documents

Notarius

Established in 1996 by the Quebec Board of Notaries, Notarius provides solutions that safeguard the long-term reliability of electronic documents.

Since its creation, Notarius has positioned itself as a Canadian market leader by ensuring the integrity and authenticity of official documents for transactions between a wide variety of professionals, business partners, clients, municipalities and government agencies.

Notarius issues and manages trusted digital signatures. This cyber security initiative is designed to protect the public and enable professionals to sign electronic documents with the same legal value as a paper document signed by hand.

Used by more than 35 professional associations in Canada, over 4000 companies and thousands of professionals across the world, Notarius' digital signature certificates are a secure, effective and economical solution that is now an integral part of many trades, professions and organizations.

Products

Notarius offers high-reliability, state-of-the-art solutions that meet the needs of its clients in terms of document cyber security, cost reduction, increased productivity and environmental conservation.

Our product offering is broken down into three categories: CertifiO is the digital signature service; ConsignO is the advanced signing platform solution; and VerifiO is the server-based validation service for PDF documents and digital signatures.

The CertifiO digital signature ensures the integrity and authenticity of signed electronic documents while certifying the signer's identity and professional status (CertifiO for Professionals) or the signer's affiliation to an organization (CertifiO for Employees).

In the case of a signature affixed to a document on behalf of an organization or department, CertifiO ensures the integrity and authenticity of the signed electronic document while certifying that the signature does, in fact, come from the signing organization or department (CertifiO for Organizations and CertifiO for Departments).

Simple and efficient, ConsignO significantly improves productivity when signing documents. This product range allows you to perform advanced and exclusive digital signature operations on PDF documents.

ConsignO is available in three different configurations: Cloud (Digital and trusted electronic signature platform), Desktop (PDF signature software), and Server (Solution to integrate digital signatures within your document management systems).

VerifiO makes it possible to verify the signer's identity as well as the integrity, authenticity and longevity of electronic documents received in large quantities.

It easily integrates with your internal solutions, does not require digital signature expertise and guarantees that a document received is unaltered, authentic and reliable.

Accreditations

Since 1998, the Notarius Certificate Authority (CA), based on a Public Key Infrastructure (PKI), has been recognized and trusted by government agencies.

In 2007, the Notarius Certificate Authority was the first in North America to be certified ISO 27001 (Information Security Management).

Notarius is also certified ISO 9001 (quality management) and is a member of leading organizations in the field of trusted third parties (FNTC, DIACC and the PDF Association).

Notarius is the only Canadian company that provides digital signatures recognized by Adobe (Adobe Approved Trust List - AATL) and eIDAS (electronic IDentification Authentication and trust Services).

All of these certifications attest to Notarius' expertise and the reliability of its signature solutions.

They Chose Notarius

Given the growing need to exchange reliable electronic documents and make trusted transactions, more and more professionals are calling on Notarius. Notarius' digital signature solutions are used in numerous professions across the world.
