DESCRIPTIONS

Electronic and Digital Signatures

CertifiO Desktop

Digital signature issued by a professional association or an employer. It certifies the signer's identity and professional affiliation. Once affixed, it ensures the integrity of the information contained in an electronic document and its authenticity.

CertifiO Cloud

Multi-platform digital signature hosted on a secure Cloud infrastructure. Issued by a professional association or an employer, it certifies the signer's identity and professional affiliation. Once affixed, it ensures the integrity of the information contained in an electronic document and its authenticity.

CertifiO Departments

Digital signature that certifies a group of signers' affiliation to a department, company, or organization. When affixed to a document by an employee, it ensures the integrity of the information contained in the document and its authenticity.

CertifiO Organizations*

Digital signature specially designed to certify an organization's identity and ensure the integrity and authenticity of the PDF documents produced by its systems and applications. In this case, a software application automates the affixing of the digital signature to make signing millions of documents easier.

**automated*

Trusted electronic signature

Electronic signature with two-factor authentication (e.g., email + text message) for greater reliability when identifying a signer. Designed for use in ConsignO Cloud, it automatically comes with the platform's digital signature. This type of signature ensures the integrity of the information that a document contains, as well as the document's authenticity.

Software and Applications

ConsignO Desktop

Digital signature software with advanced features and a PDF reader. It allows users to sign batches of documents in a few clicks and is designed to increase productivity while ensuring a high level of legal reliability.

ConsignO Cloud

Web-based electronic signature platform that manages the entire signing cycle for internal and external signature projects. Designed for both businesses and governments, it provides the opportunity to use electronic signatures according to the required level of legal reliability.

ConsignO Cloud Solo

Web-based application for affixing a CertifiO Cloud digital signature onto a PDF to give it a high level of legal reliability. Available for free to CertifiO Cloud subscribers, it allows users to customize their signature and seal appearances.

Individual

Group

Business

Application programming interface (API)

ConsignO Server (API)

Application made up of software libraries and APIs that integrates digital signature operations and PDF handling within a single platform. It is designed to personalize and automate the signing process for large volumes of documents.

ConsignO Cloud API

Programming interface that offers the possibility to integrate ConsignO Cloud's electronic signature features into an existing application. This integration creates a simplified and personalized signing experience for users and automates some or all of the signing cycle for signature projects.
